[Blood and Lace the tale](#)

Blood and Lace is the tale of 4 soldiers from an International coalition who have been changed by their experiences fighting in the depths of Hell. As they struggle to come to terms with what they have all become, dark forces rise against the world and bring them back into the thick of the fighting.

This document will list the various character that appear, keeping updated with the story itself while also not giving away spoilers. As the story goes on, and more characters are added, the page will become more organized to keep for an easier reference. This document will also contain side notes should I find it adds to the story without it being necessary within the story itself.
